Preface

PAAMS, the International Conference on Practical Applications of Agents and Multi-Agent Systems, is an evolution of the International Workshop on Practical Applications of Agents and Multi-Agent Systems. PAAMS is an international yearly event with a platform to present, to discuss, and to disseminate the latest developments and the most important outcomes related to real-world applications. It provides a unique opportunity to bring multi-disciplinary experts, academics, and practitioners together to exchange their experience in the development of agents and multi-agent systems.

The PAAMS Workshops complement the regular program with new or emerging trends of particular interest connected to multi-agent systems.

This volume presents the papers that were accepted for the 2013 workshops: Workshop on Agent-based Approaches for the Transportation Modeling and Optimization, Workshop on Agent-Based Solutions for Manufacturing and Supply Chain, Workshop on User-Centric Technologies and Applications, Workshop on Conflict Resolution in Decision Making, Workshop on Multi-Agent System-Based Learning Environments, Workshop on Multi-Agent-Based Applications for Sustainable Energy Systems, Workshop on Agents and Multi-Agent Systems for AAL and e-HEALTH.

We would like to thank all the contributing authors as well as the members of the Program Committees of the workshops and the Organizing Committee for their hard and highly valuable work. Their work contributed to the success of the PAAMS 2013 event. Thank you for your help – PAAMS 2013 would not have been possible without your contribution.
