Abstract

This presentation was made in the Rural-Path working meeting held in Zamora (Spain) in June 2nd-3rd, 2016. The main goal of this work was discussing the future application of a H2020 project regarding a platform of psychological applications of technology for health of older adults in rural areas. All these application should be integrated into a technological ecosystem [1-15] in the area eHealth and mHealth [16-18], with a special emphasis in mobile accessibility [19].

This presentation introduces SocialNet [20], a private social network for monitoring daily progress of patients by their relatives.

The main aim of SocialNet is providing a social interaction context restricted to relatives and authorized persons by the patient or his/her legal guardian, in order to they can track the daily progress of the patient.

Each patient has a private area only accessible to authorized persons and their caregivers, where they can share pictures, videos or texts about its progress.

Keywords

Technological ecosystems; Health applications; SocialNet; Rural Path; Social networks
