Regular Issue, vol. 4, n. 4 (2015)

SCOPE

The Advances in Distributed Computing and Artificial Intelligence Journal (ADCAIJ) is an open access journal that publishes articles which contribute new results associated with distributed computing and artificial intelligence, and their application in different areas.

The artificial intelligence is changing our society. Its application in distributed environments, such as the Internet, electronic commerce, mobile communications, wireless devices, distributed computing and so on, is increasing and becoming an element of high added value and economic potential in industry and research. These technologies are changing constantly as a result of the large research and technical effort being undertaken in both universities and businesses. The exchange of ideas between scientists and technicians from both academic and business areas is essential to facilitate the development of systems that meet the demands of today's society.

We would like to thank all the contributing authors for their hard and highly valuable work. Their work has helped to contribute to the success of this special issue. Finally, the Editors wish to thank Scientific Committee of Advances in Distributed Computing and Artificial Intelligence Journal for the collaboration of this special issue, that notably contributes to improve the quality of the journal. We hope the reader will share our joy and find this special issue very useful.

INDEX

Intelligent system to control electric power distribution networks by Pablo Chamoso, Fernando de la Prieta and Gabriel Villarrubia	Page 1
Multi agent gathering waste system by Álvaro Lozano, Gabriel Villarrubia, Alberto López, Daniel Hernández de la Iglesia and Jorge Revuelta	Page 9
JOUR-MAS: a multi-agent system approach to help journalism management by Alberto López, Fernando de la Prieta, Álvaro Lozano, Daniel Hernández and Jorge Revuelta	Page 23
Towards Real-Time Argumentation by Vicente Julián, Martí Navarro, Vicente Botti and Stella Heras	Page 35
Wireless controller and smartphone based interaction system for electric bicycles by Jorge Revuelta Herrero, Gabriel Villarrubia, Alberto L. Barriuso, Daniel Hernández, Álvaro Lozano and Marco Antonio De La Serna	Page 59
Learning Objects Recommendation System: Issues and Approaches for Retrieving, Indexing and Recomend Learning Objects by Ricardo Azambuja Silveira, Rafaela Lunardi Comarella, Ronaldo Lima Rocha Campos, Jonas Vian and Fernando de la Prieta	Page 69
A drug identification system for intoxicated drivers based on a systematic review by Alfonso González, Juan Ramos and, Juan F. De Paz	Page 83
