INTRODUCTION

THIS collection of words, like many things of very much greater importance, owes its formation to an accident. A casual reference in a horticultural work to Ellis’s *Modern Husbandman* induced me to consult it with a view of seeing if it contained any plant-names. I soon saw that it would be worth my while to go through the whole set of eight volumes for extracting the plant-names contained therein, some of which were quite new to me. While thus engaged, I saw many other words which seemed to me unusual, and which were often stated by the writer to be of local use; and it then occurred to me that it might be worth while to extract these also. On consulting Mr. Nodal he considered the collection thus formed suitable for publication by the English

Dialect Society; and it seemed to me then that one or two other works of similar character might be treated in like manner, and the words so obtained issued with those extracted from Ellis. I am now further encouraged in this belief by the Rev. Prof. Skeat, whose kind assistance I shall acknowledge later on; he has read the extracts in slip, and has from time to time expressed his belief as to the value of the collection.

Many of the words which I have selected are probably in more general use than I, with my very limited knowledge of the subject, am aware of. Some few, indeed, can hardly be considered as really dialect words, but I have included them because they were at any rate unusual, and thus, as it seemed to me, deserved to have attention drawn to them. Perhaps whatever value the collection may possess will be found to consist largely in the references given to many words which are included by Halliwell and other writers of dictionaries, but which have not been referred to any printed source.

[viii]

There can, I think, be but little doubt that collections of words similar to those now placed before the members of the English Dialect Society might be made with advantage from other works of a like character. There are many books on husbandry and gardening which contain much of dialectal interest—an illustration of this will shortly be issued by the Society in the shape of a reprint of Fitzherbert's *Husbandry*, under the skilled editorship of Prof. Skeat.

The following is a brief account of the works from which the present collection is selected.

I. ELLIS.—The glossary numbered I. is extracted from the works of William Ellis. Ellis was a farmer at Little Gaddesden in Hertfordshire during the last century. Very little is known about him, but from his *Modern Husbandman* we gather incidentally that he had been fifty years a resident in the locality, which makes it probable that he was born there; that he had travelled both in England and on the Continent; that he had a wife and six children, the latter of whom he took pains to train in agricultural pursuits (see *Collar* in *Gloss.*, p. 12). It is clear that he was a man of much intelligence, although he refers (*Modern Husbandman*, VI. ii 36) to his

‘illiterate’; his writings have a strong local colouring, and record for the most part his experience as a Hertfordshire farmer. An inspection of the words selected, with their accompanying extracts, will show that many of them are specified by Ellis as in use in Hertfordshire; others are from various counties, also specified: those which are not mentioned as being in use in any special locality are, I think, most probably also Hertfordshire words. The importance of this may be gathered from the fact that the *Bibliographical List* issued by the E. D. S. has no reference to any collection of Hertfordshire words, however small; and the close proximity of the county to the metropolis renders it probable that local words are in especial danger of extinction. If the plant-names used by Ellis may be taken as a criterion, the collection contains many new words; several of these plant-names do not appear, I believe, in any other work, the E. D. S. *Dictionary of English Plant-names* not excepted, although we have endeavoured to make our collection as complete as

[ix]

possible, and have consulted almost every work known to us bearing on the subject. Ellis’s works, indeed, seem very little known, or they would have been alluded to in the E. D. S. *Bibliographical List*.

I proceed to give the full titles of the works of Ellis cited in *Gloss.I.*, with the abbreviations by which I have indicated them.

Modern Husbandman = The *Modern Husbandman*, complete in eight volumes, containing—I. The Practice of Farming, as it is now carried on by the most experienced farmers in the several counties of England, for every month of the year. II. The Timber and Fruit-Tree improved, or, the best practical methods of improving different lands with proper Timber. III. Agriculture improved, or, the Practice of Husbandry displayed, shewn by Facts performed on all sorts of land, according to the old Plain, and the New Drill way of Ploughing. IV. Chiltern and Vale Farming explained, according to the latest Improvements. Necessary for all Landlords and Tenants of either Ploughed, Grass, or Wood Grounds. By William Ellis, Farmer, at Little Gaddesden. London, 1750.

The eighth volume of this work seems to be mainly a compilation from, or

summary of, the rest. Ellis also issued *The Practical Farmer, or The Hertfordshire Husbandman*, of which I have only seen the fifth edition (1759), which does not materially differ from *The Modern Husbandman*, but has prefixed to it a short glossary of terms, which I occasionally quote. *The Timber-Tree improved* is the title. of a separate and earlier work (1738), which is incorporated in *The Modern Husbandman*. Although the title-pages of the eight volumes bear the same date, *The Modern Husbandman seems* to have been issued in parts, and these were bound up differently by different people. Thus, although the part of the British Museum copy (pressmark, 235. g. 20) and that acquired for the E. D. S. correspond in nearly every particular, the volumes containing them are arranged differently. It is so important to bear this in mind in verifying quotations that I have drawn out a table showing the differences in arrangement in the British Museum copy, from which my quotations are taken and that belonging to the E. D. S. In the second column, I have indicated the position of the corresponding parts in the British Museum copy.

The whole founded on near thirty years' Experience by W. Ellis. London... 1750. 8°. Front. pp. x, 379, index. (Brit. Mus. pressmark 7954 aaa.)

This is a very complete work of its kind, and, like the rest of Ellis's writings, bears the stamp of originality. The recipes for the

[xi]

cure of various disorders are numerous, and should not be overlooked by those

interested in such subjects.

Shepherd's, Guide = A compleat system of Experienced Improvement, made in Sheep, Grass-lambs, and House-lambs: or the Country Gentleman's, the Grasier's, the Sheep-dealer's, and the Shepherd's Sure Guide: in the profitable management of those most serviceable Creatures, according to the present Practice of the Author, and the most accurate Grasiers, Farmers, Sheep-dealers, and Shepherds of England...In three books. Besides *The Timber-Tree improved* (Brit. Mus. pressmark 966 f. 24)

3

already referred to, but not quoted in this collection, Ellis wrote one or two other works which I have not seen. Donaldson (*Agricultural Biography*, p. 50) cites 'The compleat Planter and Cyderest, or a new method of planting Cyder-apple and perry-pear trees, and the most approved ways of making cyder. London, 1757. 8°;' and in the *Country Housewife* (p. 131) Ellis refers to a work of his which I have not been able to trace. He quotes it as 'The London and Country Brewer, sold by Mr. Astley, at the Rose in Paternoster Row.'

In 1772 was published 'Ellis's Husbandry, abridged and methodized: comprehending the most useful articles of Practical Agriculture. London, 2 vols.' (Brit. Mus. pressmark 1251. g. 19. 20). In the preface to this some account is given of Ellis, but not the date of either his birth or his death. We extract the following passages, which seem to give a just, rather than a complimentary, estimate of his

works, viewed from a practical agricultural standpoint:—

‘His education was something not much superior to that of the general run of common farmers, but he inherited from nature strong and active parts, which enabled him to rise into a sphere superior to his

[xii]

brethren... Any person in Great Britain might send for him, on paying for his time and expences..... Having engaged for larger quantities of MS. than his materials of real excellence would allow, all his pieces are nearly equal in being filled with trash. This did his reputation so much mischief, and at last injured him so much with the public, that he no longer found any pecuniary advantage in writing, but stuck to his farm, and very wisely depended on that alone.... instruments, he procured them, and sold them to any persons... Ellis made a traffick, sometimes profitably, of ploughs, drill ploughs, horse-breaks, &c. This induced him to be very voluminous in their description, and very hyperbolic in their praise.’

There is a good deal of proverbial and other folklore scattered through Ellis’s writings: the most interesting of this I have extracted and published in the *Folklore Record* for 1880 (vol. iii. pp. 80-86).

II. LISLE.—The words forming this Glossary are taken from ‘Observations in Husbandry. By Edward Lisle, Esq., late of Crux-Easton, in Hampshire. Dublin: printed for G. Faulkner, in Essex- Street. MDCCLVII.’ (pp. xiv, 1-530).

This is a posthumous work, and begins with an ‘advertisement by Thomas Lisle, eldest son of the author, dated Sept. 1st, 1756. From this I extract the following account of Lisle, which shows how thoroughly devoted he was to his subject:—

‘He settled at Crux-Easton in Hampshire, as far as I can collect, about the 27th year of his age, and in 1693, or 4, where he immediately determined to make the study of agriculture one of the chief amusements of his life.

‘In pursuance of this resolution, not only at the place, and in the neighbourhood where he lived, but in his journies either to Dorsetshire, where he had concerns, or to Leicestershire, in visits to his father-in-law, Sir Ambrose Phillipps of Garenton, or to

his own estates in Wiltshire and the Isle of Wight, and to other parts of the kingdom, he made it his business to search out the most reputable farmers, and get the best informations he could, in all the branches of husbandry that were known and practised in those counties. His constant method was to note down the opinions and advices he thought might be useful to him, and afterwards to add occasional remarks on them from his own experiences. For many years I believe, he had no other drift, in employing himself after this manner, than merely his own information and improvement; but about the year 1713, he seems to have entered into a design of making his observations public; for I find he had

[xiii] begun an index, and had thrown together some thoughts, as an essay towards an introduction, dated at that period. Through his other studies however, which were chiefly in divinity, in which he has left a very long and laborious work; his frequent attendance on the business of his neighbours in the capacity of justice of the peace, and the care of a numerous family (for he had no less than twenty children, of whom seventeen survived him), hindered him from pursuing this his intention, yet they did not interrupt his first design, but he continued writing down his inquiries and experiments to the time of his death, which happened in the year 1722.

‘As these observations therefore were left in such disorder, as to require no small pains and application to regulate and digest them, and as all his sons, except the eldest, were bred to professions, and those very foreign to that of agriculture, and had neither leisure nor inclination for an undertaking of this nature, they would, in all probability, have been entirely suppressed, had not I accidentally communicated them to some farmers of my acquaintance, as likewise to some gentlemen, who amuse themselves in husbandry, who were all of opinion they might be of use to the profession, and encouraged me to collect them under their several heads, and put them into the order in which they are published.

‘Some of his readers will smile, no doubt, to see the names of many of our English farmers mingled together with those of the ancient Romans, Varro, Cato, Pliny, Columella, and Palladius, and with those also of our own writers, Lord

Verulam, Evelyn, Ray, Grew, Boyle, and Mortimer; but, had I thrown them out, I must have given an entire new form to the whole, and when I had done all this, the reader, in my judgment, would have owed me no thanks for my pains: it would have robbed the work of an agreeable simplicity, and made it appear less genuine. I was inclined therefore to print it as I found it, and was pleased to find this inclination seconded by the advice of many of my friends.’

The words selected are taken partly from an ‘Explanation of terms in husbandry, used in the foregoing observations,’ which occupies the two last pages of the book; and partly from the body of the work, in which the explanation of many of them is given in a marginal note. All the words in the ‘Explanation ‘ are included except the following, which seemed to me scarcely worthy of insertion, but I give them here, so that the list may be complete:—*Ana*, *Cotyledons*, *Declivous*, *Idiosyncrasy*, *Præcocious*, *Succedaneous*, *Viliorate* (‘to make worse, impoverish’). The words seem to be for the most part such as were in use in Hampshire and the adjoining

[xiv]

counties, but some are from Staffordshire and Leicestershire, and others apparently of general use. I have usually given the context, to show, when possible, where the word is used. There are many words in the book which strike me as of unfrequent occurrence, although hardly suitable for inclusion in the present list; while, like the works of Ellis, it is clearly a volume which deserves the attention of all interested in the history of English agriculture.

Besides the edition from which I have made my extracts, there are at least two others, both in the Library of the British Museum. The first is a quarto volume (pp. xiv, 452), with a portrait of the author, dated 1757; the second (‘second edition’) is of the same date, but in 2 vols. octavo (vol. i. pp. xxii, 400; vol. ii. pp. 408): their pressmarks respectively are 33. f. 8 and 7074. ccc.

III WORLIDGE.—Little appears to be known of the life history of John Worlidge or Woobridge of Petersfield, in the county of Hampshire, Gentleman. He wrote several treatises on agriculture, gardening, and bees, of which the principal is, ‘Systema

Agriculturæ, Being The Mystery Of Husbandry Discovered and layd Open.’ London, 1669, folio, Ed. 2. 1677; Ed. 3. 1681.’ Octavo editions appeared in 1687 and 1716, the title being altered to ‘A compleat system of Husbandry and Gardening, or the Gentleman’s Companion, in the Business and Pleasures of a Country Life.’.... Worlidge is considered to have taken a scientific view of agriculture, so far as the notions of his time permitted; he must therefore be held as being in advance of his contemporaries.

The Glossary as here printed consists of the ‘Dictionarium Rusticum,’ which, although it has a separate title-page and preface, forms part of the ‘Systema Agriculturæ’: the third (1681) edition is that which I have consulted. I have selected other words which seemed to me interesting from the body of this work; such are enclosed in square brackets, as are are some cross-references which I thought would be useful. Many of the words included by Worlidge in the ‘Dictionarium’ seem, however, to me, to quote his own words, ‘terms so universally understood that they need no interpretation,’

[xv]

and I have therefore omitted them; but I enumerate them here, so that the list as Worlidge gave it may be complete:—

Although it contains some interesting words, the 'Dictionarium' is a less valuable and characteristic production than either of the preceding. The author has laid Ray largely under contribution, as may be seen by a comparison of his work with E. D. S. *Gloss.* B. 15, 16; and his words are not referable to any special locality. His

preface is quaint and suggestive, and might fitly be taken as introductory to the present collection.

IV. ANNALS OF AGRICULTURE.—The words forming this Glossary are selected from ‘Annals of Agriculture and other useful Arts; collected and published by A. Young. London, 1784-1815.’ 8°.46 vols.

I have added the counties where they were in use whenever these were specified, or when I could ascertain them from the context, which was not always possible. The number of words obtained scarcely compensates for the labour of hunting through the forty-six volumes of the *Annals*, but there are among them some of interest. Arthur Young was a well-known writer upon agricultural subjects, but the *Annals* is largely occupied with translations of foreign papers, and does not impress me as having met with very great support from practical men.

V. AGRICULTURAL SURVEY.—These words are taken from a series of reports undertaken at the instance of the Agricultural Survey, each being issued separately in different places, and at dates extending from 1793 to 1813, the title-page uniformly running thus: ‘General View of the Agriculture of the County of... with observations on the means of improvement.’

In the present selection only the English counties are included, although a similar series of reports was issued for Scotland. The reports are by various hands, the name of the author being prefixed to each. I have indicated the counties and the pages of the report on which the words occur. They form eleven small quarto volumes in the British Museum Library (pressmark 41 b. 6-16), the counties being arranged in alphabetical order. This set does not include all the counties surveyed by the Board of Agriculture, some of which came out in octavo, and occasionally reached a third edition.

VI. AGRICULTURAL PROVINCIALISMS, and VII. WEIGHTS AND MEASURES.—Of these it is only necessary to say that they are reprinted, by the kind permission of the publishers, Messrs. Blackie

[xvii]

and Sons, from *The Cyclopedia of Agriculture*, by John C. Morton (1863). I have introduced a few cross-references in square brackets. The subject of a collection of the names of local Weights and Measures was brought before the readers of *Notes and Queries* in 1878 by Mr. Robert Holland (5th s. x. 283), when a good deal of information was elicited. A yet more complete list than that compiled by Mr. Morton might be made, and would be very useful; meanwhile I may direct attention to the very elaborate notes on the subject in Miss G. F. Jackson's *Shropshire Word-Book*, pp. lxxxiv-xciii.

It will be observed that I have not attempted the collation of the 'Old Country Words' with other Glossaries. I have neither the learning nor the leisure for such a task; nor indeed do I think that this is at present necessary, or even desirable. The aim of the E. D. S., as I understand it, is rather to collect than to elaborate; I have therefore contented myself with a running comparison of the words with Halliwell and such other works as happened to be under my hand at the time, adding references to these here and there when I thought it desirable. But my own deficiencies have been more than supplied by the very generous assistance which I have received from two members of the E. D. S., each in his way fully qualified for the work. Prof. Skeat has kindly read the whole of the collection in slip proof, and his notes (signed W. W. S.) are, as is always the case, most useful and suggestive. Mr. Robert Holland has brought his practical knowledge to bear upon the subject, and his additions (signed R. H.) give a satisfactory indication of what we may expect from the Cheshire Glossary which he has in preparation for the Society. To each of these gentleman my hearty thanks are due, and I am sure that this expression of gratitude will be endorsed by the members of the E. D. S., for whose acceptance this collection of 'Old Country Words' is offered.

Turnips ‘did *apple* or *bottle* well.’—*Id.*, IV. iv. 70.

It would seem as if Ellis were alluding to some popular idea that the formation of tubers of potatoes, bulbs of turnips and such like, was due to the roots having been checked, as it were, in their growth by contact with the hard material of the soil.—R. H.]

Apron-string-hold. Property held in virtue of a wife. Arpent, or Arpent-weed. *Sedum Telephium*, L., a corruption of Orpine.

‘A certain weed called in Hertfordshire, *Arpent*.’—*Modern Husbandman*, III ii. 177, where there is a long description of its ‘pestiferous’ qualities as a weed in crops of corn and beans.

Arse. ‘The *arse* or tail of the plough.’—*Modern Husbandman*, II. i. 11.

Lay the sheaves ‘in a sloping posture, close together, with their *arses* outward.’—*Id.* V. i. 11.

[The word is in frequent use in Cheshire. The tail-board of a cart is always

called the *arse-board*: and the stalk-end of a potato the ‘arse-end of a ‘tater.’—
R. H.]

Arsmart. Usually applied to *Polygonum Hydropiper*, L., but Ellis seems to intend the
land form of *P. amphibium*, L., under the name (III. i. 47).

Back, or Bake-stone. See **Jannock**.

Backboughting (spelt Also **Backbouting**). ‘Is done by drawing the plough once
forward and backward, through that which has been boughted.’—*Gloss. to
Pract. Farmer*. See **Boughting**.

[3]

Backing a hedge. ‘When the short thorn is left to grow as a defence, either to the out
or inside part, it is called, by the Vale-men, *backing a hedge*; that is, it serves
as a back or fence to save the quick, and so is named an *inside back* or an
outside back.’—*Modern Husbandman*, I. i. 97.

This method was used by the Vale-men; *plaishing* by the Chiltern men. See
Modern Husbandman, II. ii. 139.

Baconer. A pig kept for *bacon*.—*Modern Husbandman*, I. i. 25.

Bag up. See **Mow and bag up**.

[To put into sacks for carrying away: in the north of England sacks are usually
called bags.—R. H.]

Bait. To pasture or feed.

‘Take [the sheep] off the common, and *bait* them (as we call it) on clover or
other artificial grass.—’*Modern Husbandman*, III. i. 146.

Bake and cake. ‘Great rains... are apt to *bake and cake* (as we call it) the ground.’—
Modern Husbandman, II. i. 33.

Baking. ‘The horses go in the last furrow, and thereby miss treading and *baking*, as it
were, the ground down so close.’—*Modern Husbandman*, II. ii, 104.

[Hardening. In ploughing with a single file of horses, as was the custom in
Ellis’s day, they all follow one another in the hollow furrow from which the
preceding ridge has been turned, and thus do not tread and harden the portion

already ploughed. The plough then turns another ridge over the gutter in which the horses have walked. Thus they leave no footmarks. In ploughing with two horses abreast, as is the *Modern* custom, the same care is taken not to tread the ploughed ground. The chain by which the horses pull the plough is so arranged that one horse shall walk in the gutter, and the other on the *land* or unploughed ground. Some horses become much cleverer than others in walking in a narrow furrow, and are always put at that side of the plough.—R. H.]

Bale. ‘By mowing barley with the sithe and cradle there is more work done in a day than can be done with a sithe and *bale*.’—*Modern Husbandman*, V. ii 13. See **Cradle**.

‘The sithe with a *bale* fixed to it.’—*Id.*, 16.

Bandy. Clay is sometimes ‘apt to burn into a hard substance (clinker like), as to defy the frosts and *bandy*.’—*New Experiments*, 21. ‘We either throw or beat the mould about with *bandies*.’—*Modern Husbandman*, VI. ii. 110.

[Evidently sticks used for clod-breaking. The name seems to imply that they were of the same form as the curved sticks with which boys play the game of hocky or *bandy*, which would be very convenient for the purpose, though I have never seen them so used. In the north *clod-malls* are used, which are made by fixing a small block of wood, by means of a hole bored through it, to the end of a long stick, and this, also, is a very efficient, though simple implement. The *bandies* spoken of may have resembled these.—R. H.]

[4]

Bandy-wicket. A Herts game.—*Shepherd’s Guide*, 199.

Banel. ‘A *banel*, churn, heads, or any other new-invented dairy utensils.’—*Modern Husbandman*, V. ii. 93.

Bash. To knock down. Acorns 'are commonly *bashed* down by poles on purpose' for *hogs*.—*Modern Husbandman*, VI. ii. 90. Hal gives this as a *Beds.* word.

Bashing. 'A *bashing* wet time.'—*Modern Husbandman*, V. i. 57.

See preceding. A *bashing* wet time would mean that the rain was so heavy as to beat down the surface of the soil See **Brooking**.

Basaan. They 'stake their horses with *bassan* ropes.'—*Modern Husbandman*, III. i. 169.

Bass-rope (i.e. *bast*-rope).—*Id.* IV. i. 68. See **Bass** in *Dict. of English Plant-names*.

[*Bassan*= *bast-en*, the adjectival form, like *oaken* from *oak*, *beechen* from *beech*, and *aspen* (now used as a *sb.*) from *asp* or *aps*, the old name of the tree.—W. W. S.]

Bastard-cook. See **Haymaking**.

Baulking. To 'miss plowing some of the ground, which is what we call *baulking* it.'—*Modern Husbandman*, VI. ii. 14. Hal. has '*Baulk*, to overlook or pass by a hare in her form without seeing her'—a somewhat similar meaning.

Baulks of grass. 'Those which some call hedge-greens; they lie next to the hedges in ploughed fields, and serve to turn the plough-horses *on*.'—*Gloss. to Pract. Farmer*.

[The head-rigs or head-butts in a field left in grass instead of being ploughed. The practice is not unfrequently followed in Cheshire. After the ploughing is all done, and there is no further necessity for head-rigs to turn upon, they are left to grow into bay grass and are mowed.—R. H.]

Baum. Balm, *Melissa officinalis*, L.—*Modern Husbandman*, IV. ii. 123.

[A division of a building open on one or more sides like one of the compartments of a long hay-shed; or separated from the rest

[5]

of the building merely by a low wall. The old-fashioned barn, when flails were in use, generally consisted of a threshing-floor in the middle, and a *bay* on each side for the storing of corn in the sheaf. The word is in common use in Cheshire, where also the gangway between two rows of cows, from which they are foddered, is called a *fodder-bay*.—*B. H.*]

Bean-dye. A kind of pea. It 'is of a whitish colour, with a black speck or eye in it, and therefore it is called *bean-dye*, or rightly *bean-eyed* pease.'—*Modern Husbandman*, II. i. 58.

Beaned-eye would probably be a more correct spelling. It is also called **Codgel-pea.**

Beanweed. *Pinguicula vulgaris*, L.? A farmer living near Ellis 'observed that his sheep were so much in love with a certain weed called *Beanweed*, that when they had an opportunity they would run greedily in quest of it. It grows in the moory ground of vales, comes up about a finger's length, in the spring time of the year, like a bean, and most of all in wet weather; the leaf of this bean-weed is of so sammy a nature that it feels, on being squeezed, as if it was greased, and being thick withal, it contains much sap in it, and thereafter it presently breeds the rot in the bodies of the *sheep*.'—*Shepherd's Guide*, 164.

Bearbind. *Convolvulus sepium*, L. 'Apply the rough part of the leaf *bearbind* to a green wound.'—*Country Housewife*, 266.

Bearing, n. See **Withering.**

To bear stock. See **Stock** (1).

Beaver. [*Lit.* a drinking.— W. W. S.] 'Cheese is such a necessary, convenient, and wholesome food for our men [in harvest-time], that we are obliged not only to send some to them in the field, morning and noon, but they eat wholly on this and bread at one time of the day, which they call their *beaver*, and this is commonly about four of the clock in the afternoon.'—*Modern Husbandman*, V. iii. 146.

In Essex: (Chelmsford Hundred) *beaver* is the first meal taken by horse-

keepers after beginning work. It is taken about 10·30 a.m., and lasts an hour, during which time the horses are fed. During harvest-time, however, all the men working in the fields have *beaver*, which is equivalent to luncheon. It is taken at 10·30 a.m., but lasts only twenty minutes. During harvest and hay-time an extra meal, called *fours*, is taken in the fields at 5 p.m.: this is equivalent to tea. This corresponds with the *Cheesing-time* mentioned by Ellis (which see). See *Fourings* and *Four o'clock* in Hal.

Beck ('The *beck* and broad hand-hough.'—*Modern Husbandman*, IV. i 75), or **Beck-hough**. 'An instrument differing from the common pick-axe or mattock, only by having its two ends about four inches broad, with which they dig up the ground of hop-alleys.'—*Modern Husbandman*, IV. i. 16. The tool was in general use at Farnham, Surrey.

Bee, Golden. See **Golden Bee**.

Beetle. A fly that 'blows' sheep.

'The *beetle*, or the horse-bee, and fly.'—*Shepherd's Guide*, 339.

[6]

Belcher's black cherry. 'Judges..... say it is a word compounded of the two words, *bel* and *cerise*, signifying a fine cherry.'..... But 'a lord's gardener' said that the name arose from a man whose name was Belcher; who, I suppose, he imagin'd was the first discoverer of it.'—*Modern Husbandman*, V. ii. 29. The term is more usually applied to a mixture of oats, pease, and vetches (E. D. S. *Gloss.* B. 16, and Tusser), or to a mixture of peas and oats (E. D. S. *Gloss.* B. 21). Gerard applies it to the Buck-wheat (*Polygonum Fagopyrum*, L.).

[Apparently relates to a puffy swelling which is frequently seen under the belly of a cow about to calve, extending from the udder to the navel, or beyond.

[This peculiar state of soil where the surface becomes hardened in in Cheshire

called 'clapped.' I think sandy soils are almost more liable to 'clap' than clay soils.—R. H.]

Cast. See **Swarm.**

'They rake and *cavin* oats.'—*Id.*, VI. iii. 75.

'Threshed and *cavined*.'—*Id.*, VI. iii. 66.

Hal. has '*Caving*, chaff and refuse swept from the threshing-floor. *East*.'

[I take *cavings* to be the broken ears and bits of straw which break off in threshing corn. They are first of all raked from among the threshed grain, and then passed through a coarse sieve (called in Cheshire a *cheevy-riddle*), or rather the loose grain, if there be any, passes through the sieve, and the *cavings* remain behind, to be threshed over again, or, more frequently, given to the cows.—R. H.]

Chamleted. [Having the appearance of *chamlet*? Chamlet is the same as *camlet*, a well-known kind of stuff.—W. W. S.]

'Beautiful *chamleted* and lasting timber.'—*Modern Husbandman*, VII. ii. 34.

Some [ash] is curiously *camleted* and veined.'—*Ib.*, 39.

'If the *chap* is a ready-money one, and takes off a good quantity, is a sharp inspector, and like to continue a customer, then he shall have the better sort' of soot.—*Modern Husbandman*, I. i. 85, where there is an interesting paragraph on 'the *bites* of chimney-sweepers, as they relate to good and bad soot.' Also II. i. 61.

Chapping. 'Keep the bottom and sides [of the pond] from being damaged by the tread

of cattle, and from *chapping* by the sun and wind.—*Modern Husbandman*, IV.

[11]

Cheese. ‘The common sort of cheese, sold in shops, is what they call **new-milk cheese**, which, to answer the appellation, should be made with all new milk; but this seldom happens, because it is generally made with half skim and half new; or what is more properly called **two-meal cheese**.’ There is also ‘one called **three-meal cheese** that is made with two parts skim and one part new.’—*Modern Husbandman*, III. i. 111, 112. Other kinds are **morning-milk cheese, evening-milk cheese, and fleet-milk cheese**.—*Id.*, 124.

Mr. Skeat notes: ‘*Meal* is the A.S. *mæl*, a season; time; hence (1) a season for eating, Mod.E. *meal*; (2) a season for milking, *i. e.* a milking-time, a single time of milking.’

[*Meal* in Cheshire means a milking. The milk given by the cows at night is called the ‘evening’s meal,’ that in the morning the ‘morning’s meal.’ A ‘two-meal cheese’ means in Cheshire a cheese made from two milkings, a ‘three-meal cheese’ from three milkings, and so on. - R. H.]

Cheesing-time. ‘While the harvest lasts, the men about four of the clock in the afternoon sit down in the field for about half an hour, which they call *cheesing-time*, by reason that in this space of time they eat a piece of bread and cheese.’—*Country Housewife*, 73. See **Beaver**.

Chilturn Countries. ‘Hertfordshire in general, most part of Kent, Essex, Norfolk, Suffolk, Berkshire, Wiltshire, and many other counties abounding in chalky,

sandy, gravelly, and loamy soils, are deservedly called *Chilturn countries*, as being of a short dry nature, and lying in dry situations, contrary to late-lands, that for the most part are of a stiffish, wettish nature and situation.’— *Modern Husbandman*, II. i. 27.

Chipping. Germinating. ‘The *chipping* part of the wheat, as we call it in Hertfordshire.’— *Modern Husbandman*, VI. ii. 5.

Chipping-time. The period of germination. ‘If it [wheat] has a good sprouting or *chipping-time*, it may yet be killed by the frost.’— *Ib.*, I. i. 2.

Chuckle. ‘I chuse to buy in [a bull] the most taper-headed, rather than too much upon the *chuckle*, or *round*.’— *Modern Husbandman*, IV. i. 152.

[Many farmers in Cheshire still prefer a taper-headed bull to one with a broad, masculine head. Taper-headed bulls are supposed to beget taper-headed calves, and this form of head generally indicates good milking qualities. It is also considered by farmers that narrow-headed calves insure to the cow an easier parturition.—RH.]

(1) The placenta itself.

(2) ‘To bring away her *glean.*’—*Id.*, IV. i. 160.

[In the north the word is *clean*, and the placenta is called the ‘cleansing.’ It is considered good for a cow to lick her calf, for the slime with which it is covered probably acts medicinally; and it is certainly good for the calf to be licked, for nothing promotes circulation and warmth better than the rough tongue of the cow; and as cows are fond of salt, it is very customary to sprinkle salt on a newly born calf to induce the mother to lick it. It is, doubtless, the slime, and not the salt, that does the good, if it really has any effect at all; but our cowmen have lost sight of that, and generally say that the salt counteracts the sickliness of the slime. -R. H.]

[The Welsh *glain*, *glan*, is the same word as, and cognate with, the English *clean*. This explains it. See *Clean* in Skeat’s *Etym. Dict.*—W. W. S.]

[Offal wheat is the lighter grains winnowed out from the marketable samples, but still useable for feeding fowls. The offal of an animal has, agriculturally, no particular reference to the

[‘Tramasericeum, seolcen *ab*,’ *i. e.* silken *abb*; Wright’s *Vocab.*, i. 40, 1. 4. Wright adds in a footnote: ‘The yarn of a weaver’s warp is, I believe, still called an *abb*.’ See *abb* in Hal.— W. W. S.]

Aftermass. ‘Aftermath; lattermath; second crop of grass mowed in autumn.’— *Gloss*.

Backside. ‘Farmyard.’—*Gloss*.

Berry. The grain of corn.

‘Such ground as bears sour grass, however it may bear a burden of straw, will not bear a plump *bery*, but a thin coarse sort, which will not fill the bushel, as finer *rin’d* or floured corn will do.’— p. 54.

Beviss. ‘Mr. Clark [of Leicestershire] said a cow-calf would make very pretty beef at three years old, but, if killed sooner, they called it *beviss*.’—p. 259.

[Probably *beef-ish*, i. e. beef-like—not quite beef, but like it.—W.W.S]

Black-burnt. See **Burnt-ear.**

[58]

Black-legs. ‘They have a distemper in Leicestershire frequent among the calves, which in that country they call the *black-legs*, but Mr. Glenn, who lives at Utoxcester, in Staffordshire, calls it *wood-evil*. It seems it is a white jelly, and sometimes a bloody jelly settling in their legs, from whence it has it’s name of *black-legs*... I find by Sir Ambrose Phillipp’s shepherd, it is of the same nature with the *wood-evil* in sheep, which, he says, are also so affected.’—p. 347.

[Youatt (*Cattle*, p. 474) describes two ailments known to veterinary practitioners as *Wood-evil*. The first, caused by browsing on the young buds of trees, ‘and particularly on those of the ash and oak. These buds are tempting to cattle at the commencement of the spring, but they are of too acrid and stimulating a character to be eaten with impunity in any considerable quantities.’ The symptoms—somewhat serious—are then given in detail, and this seems to be the disease described by Lisle as *oakered* (which see). The second *wood-evil* spoken of by Youatt seems to be the disease which is also known in Hants as *Black-legs*. ‘Some veterinarians give the name of *wood-evil* to complaints allied to rheumatism, or being essentially rheumatic’ (*Cattle*, p. 474).—R. H.]

Bladder. ‘There is a distemper that falls on a bullock in the spring.... occasioned by the overflowing of the blood, which they in their country call the *bladder*; the bullock will be taken with a swelling of his lips, and running of his mouth, and swelling of his eyes, and running of them.’—p. 343.

[See *Brittene* in Hal. Icel. *brytja*, to chop meat; *brjóta*, to break. Not ‘to fall’ but ‘to shed,’ hence ‘to let fall:’ *brit* is only a variant of *break*.—W. W. S.]

Burnbeak, burnbate. ‘To cut up the turf, and burn it on hillocks on the land.’—*Gloss*.

[Corrupt forms of *burnbeat*. In Kennett’s MS. *Gloss*. we read: ‘To *burnbeat* land, to cast up turfs or parings of earth upon esse or ashes of turf, with any other stubble or rubbish, and burning all together for a compost upon dry heathy land. *Staff*.’ See *Beat* in E. D. S. *Gloss*. B. 6.]

Slink. To cast a calf.

A cow ‘after she has *slunk* her calf, will be apt to make some of the others, *slink* also.’—p. 332.

[It is a common belief amongst cow-men that a cow which casts her calf influences others to do the same; accordingly she is generally removed from the others, and charms are frequently resorted to to avert the misfortune. That abortion is to some extent epidemic is an acknowledged fact; but the reason is, no doubt, that the same cause, perhaps the presence of ergot in the pasture, is acting upon the whole stock of cattle.—R. H.]

Sogging. Soaking. ‘If such wet clay-land had... lain *sogging* in the wet.’—p. 50, See **Quatt**.

[Soaking. Same word, as I could prove. The A.S. for *suck* is both *súcan* and *súgan*; and *soak* is connected.—W. W. S.]

Spalt. ‘To turn up; it *spalts* up from below the staple, *i. e.* the bad ground turns up in ploughing from below the good mold, which is difficult to be avoided when the land is ploughed *dry*.’—*Gloss*. See *Spalt* (1) in Hal.

Spriggy. ‘When the ends of the wool on the backs of the sheep twist and stand *spriggy*.’—p. 392. Cfr. *Sprig* (2) in Hal

Spurning. Spreading dung or lime.

‘*Spurning* is throwing it abroad on the earth just before sowed.’—p. 36.

Staffold. ‘I made my wheat-reek on *staffolds*.’—p. 223.

‘If [the wheat] be designed for a *reek-staffold*,’ &c.—p. 208.

[A stand on which to place the rick, so as to raise it from the ground; in some

places called a staddle.—R. H.]

[A rustic mistake for *scaffold*, a *fine* English word of French origin. The rustic naturally substituted the *st* of his familiar *steddle* or *staddle*. Cfr. *bedstead*, *bed-steddle*.—W. W. S.]

The petals of peas ‘expand themselves in so *strutting* a manner.’— p. 198.

See **Chest**.

Suant. ‘Kindly, even, regular. Probably from the French word *suivant*.’—*Gloss*.
Flourishing, p. 173; well., p. 239.

[Not from the Mod. French *suivant*, but from the *Old French suant*, which is the same word, but an older form. It occurs in E. *pur-suant*. Cfr. E. *poursuivant*, later spelling of same. M.E. *sewyng*, *P. Plowman*, Text C, pass. xix. l. 63. To derive *suant* from *suivant* is impossible. It is like deriving the Latin *ille* from the French *le*; it is the other way about.—W. W. S.]

Swag. See **Sleek**, and *Swag* (2) in Hal.

Swigging. A Dorsetshire method of castrating lambs.—p. 370.

Tail-soaked. ‘Having had a cow *tail-soaked*, or with a worm in her tail’—p. 349.

[Cows in marshy ground are subject to slight attacks of palsy, and the ignorant herdsman, and frequently the cow-leech himself, attributes the disease to a worm near the extremity of the tail, where there is always a slightly softer place. This soft place is supposed to indicate the presence of the worm, and various remedies are resorted to, frequently of a superstitious character, such as making an incision in the soft place and inserting a piece of rowan tree (Youatt, *Cattle*; p. 302). Other diseases are sometimes attributed to the supposed worm in the tail, the belief in which is very general. R. H.]

Warp. ‘Miscarry, slink her calf.’—*Gloss*. See **Slink**.

Weaning (Leicestershire). ‘About the beginning of May was commonly

[71]

monly the time that their barley took its *weaning*, that is, when the leaves of the barley begin to die, having till that time been for the most part nourished by the milk and flour of the corn; but then it begins to put forth new roots, and new leaves, and to betake itself wholly to its roots for nourishment.’—p. 146.

Woodseer-ground. ‘Loose, spongy ground.’—*Gloss*.

‘Loamy, ferny, loose.’—p. 140. ‘Poor.’—p. 165

Woodsheer. ‘The proverbial rhyme holds not good of cold hill-country lands, tho’ consisting of strong clays, which yet is very true, when applied to Leicestershire, and other deep lands warmly situated:

“I came to my wheat in May
And went sorrowful away:
I came to my wheat at *woodsheer*
And went from thence with a good cheer.”

For, in cold hill countries, whoever sees not the ground well stocked with green wheat by the beginning of May, will never see a good crop..... The word *woodsheer* is understood for the froth which, about the latter end of May, begins to appear in the joints of plants, and is more commonly called cuckoo-spit.’—p. 164.

The meaning, however, of *woodsheer* here seems to correspond with that of *wood-sere* in Hal., ‘the month or season for felling wood.’ See also E. D. S. Tusser, 51/6 (p. 111), and *Gloss*. p. 350.

Yeanning. Lambing.—p. 363.

DICTIONARIUM RUSTICUM

OR, THE
INTERPRETATIONS AND SIGNIFICATIONS OF SEVERAL RUSTICK TERMS
USED IN SEVERAL PLACES OF ENGLAND: AND ALSO THE NAMES OF
SEVERAL INSTRUMENTS AND MATERIALS USED IN THIS MYSTERY OF
AGRICULTURE, AND OTHER INTRICATE EXPRESSIONS DISPERSED IN OUR
RURAL AUTHORS.

BY J. W[ORLIDGE].

LONDON: *Printed for* THOMAS DRING, *over against the Inner*
Temple-Gate in Fleet Street, 1681.

[74]

TO THE READER.

THIS dictionary, above any other part of this book, may be thought superfluous because it being intended only for the use of husbandmen, they above all others best understand the terms, and their several significations; so that herein we seem to instruct those that are best able to teach us; which might be true if they all spake the same language: but there is such a Babel of confusion, as well in their terms and names of things, as there is in the practice of the art of agriculture itself, that remove a husbandman but fifty or an hundred miles from the place where he hath constantly exercised his husbandry to another, and he shall not only admire their method and

order in tilling the land, but also at their strange and uncouth language and terms, by which they term their utensils, instruments, or materials they use, so much differing from those used in the country where he dwells.

Also our several authors that have written of this subject, very much differ in the appellation of several things, they generally speaking in their writings the language of the place and age they lived in; that their books read in another part of the Country or in succeeding times, seem either fabulous or intricate. Wherefore, that our authors and this present tract may be the better understood, and that one countryman may understand what another means in a remote place: I have here given you the interpretation and signification of such words and terms that I remember I have either read or heard; which I hope may satisfie and supply that defect of such a dictionary that hath been so long complained of. If any terms are wanting, or not rightly interpreted, I desire you to consider the place you live in, where perhaps may be some terms used or so interpreted, that are not so in any other place of England, which may I hope sufficiently excuse my ignorance of them; or else they may be terms so universally understood, that they need no interpretation; as Wheat, Rye, Cart, Waggon, &c.

Arrish-mows. ‘They have a practice in Cornwall of putting up their wheat, barley, and all other kinds of grain, in the field, into what is called *arrish-mows*. The sheaves are built up into a regular solid cone, about twelve feet high; the beards all turned inwards, and the but-end only exposed to the weather. The whole finished by an inverted sheaf of reed or corn, and tied to the upper rows.’ *Cornw.* 63. See E. D. S. *Gloss.*, B. vi., and *arrishes* in Hal. *Arish* is a term still in use for a stubble-field in Cornwall: in a Report for that county in the *Mark Lane Express* for Feb. 2, 1880, it repeatedly occurs; e.g. ‘Farmers are very busy ploughing the *arishes* by this time.’

[This remnant of feudalism is still in existence in Cheshire and Lancashire, though fast becoming obsolete. The work so done by tenants is called *boon-work*. There was generally a clause in farm agreements by which the tenants were bound to do a certain number of days’ *boon-work* for the landlord, according to the size of their holdings. The following clause is from an agreement from year to year, dated 1854: the agreement is still in force, but, in this case, the clause has been allowed to drop into disuse. ‘The tenant to deliver to the landlord on the 1st day of October, yearly and every year, one good and marketable cheese, without any allowance for the same, and to do six days’ team work for the landlord.’ Before the present Highway Act came into force,

it was customary also for farmers to work off a portion, sometimes the whole, of their rates, by doing *boon-work* upon the roads. This is now prohibited by the Act.—R. H.]

[The stalls in which cows are tied up are in Lancashire and Cheshire (and presumably in Derbyshire) called *booses*. *Boosey*, therefore, literally means that which appertains to, or is contiguous to, the *booses*. The outgoing tenant gives up his land in February, with the exception of a *boosey* pasture, or outlet, and his house and buildings in May; his landlord being compelled, according to the custom of the country, to give him a field in which his cattle may be turned out to water and for exercise. The field selected is generally, in fact always, one which is adjacent to the shippons (cow-houses).—R. H.]

VI. AGRICULTURAL PROVINCIALISMS.

FROM MORTON’S ‘CYCLOPEDIA OF AGRICULTURE’ (1863),

VOL. II. PP. 720–727.

The purpose of the following glossary, or dictionary of provincial terms, is to furnish the explanations which readers of local agricultural literature often need, and without which they are either puzzled, or misled by such merely local terms as have no proper place in the English language. However far from perfect the following list may be, it has not been without considerable labour, and indeed personal application in every important district in the kingdom, that it has been compiled. Successive circulars have been issued, in which information on local names, usages, &c., have been asked, and to which instructive replies have been very generally received. There

is no doubt that a good dictionary of agricultural provincialisms would be of material value in the explanation of our agricultural literature, the lessons of which are often obscure, if they do not positively mislead, owing to a misapprehension of the terms in which they are conveyed. The following is a first attempt, admitting, no doubt, of great improvement, which it will probably hereafter receive. There are two classes of provincial names and words not mentioned here; for which we refer to the articles WEIGHTS AND MEASURES, AND WEEDS* :—

Addle (*Yks.*), to earn. [See Hal. (1).]

Afterings (*West Eng.*, &c.), last drawn milk.

Ailing-iron (*Warw.*, &c.), hand implement for hummelling barley.

Ails (*Wilts.*, *Glou.*, &c.), the beard of barley.

Aims—hames—the arms that hold the traces to the collar. **Pin Aims**, those on the middle horses in a team.

[‘ The ‘Weights and Measures’ form No. VII. of the present series: the names of weeds are incorporated into the E. D. S. *Dictionary of English Plant-names*.]

[132]

Aither (*North Eng.*), a course of cropping, or portion of the rotation.

Aiver (*Scotl.*), a noble-looking saddle-horse; a gelding.

Angs (*Cumb.*), beard of barley.

Arish-mow (*Cornw.*), 200 sheaves in a circular rick. (See *Agric. Survey*, p. 117.)

Arles (*Scotl.*), money given as ‘earnest’ on hiring. [See Hal.]

Arms of a waggon (*Wilts.*, &c.), those parts of the axle-tree that go into the wheels.

[Formerly they were simply a continuation of the wooden axle, thinned so as to work in the hollow of the nave; now they are made of iron let into the thick wooden axle. The foundation of a cart is very durable, and in Cheshire, and no doubt elsewhere, there are still many very old carts in existence with the original wooden arms.—R. H.)

Arrish (*Cornw.*), same as **Eddish**.

Aul or **Orl** (*Heref.*); **Owler** (*Lanc.*), an alder-tree.

Avald (*West Scotl.*), an *avald* crop is the second white crop in succession on the same land.

Awart (*Perthsh., &c.*), see **Avald**. Also applied as **Awelled**.

Awelled (*Dumfriessh.*). A sheep is said to be *awelled* when *cast*, that is, lying helplessly on its back.

[The accent is on the second syllable. It is allied to *over-welting*, which is used in the same sense.—W. W. S. See **Rigwelting**.]

Backstriking (*Suff., Ess., &c.*), a mode of ploughing, in which the earth once turned is simply thrown back again.

Bag, to cut standing corn with a heavy hook, using a wooden hook to hold the corn by. In *Lanc.* to cut stubble with the scythe and foot.

[The hook used for cutting is called a *bagging-hook*; it resembles a sickle in shape, but has a broader blade with a smooth instead of serrated edge.—R. H. See *Bag* (2) in Hal.]

Baikie (*Scotl.*), the stake to which the cow is fastened in the byre.

Bail (*Suff., Norf., &c.*), the bow of a scythe; the handle of a bucket; also the uprights to which cows are fastened in byres.

Blendings (*Yks.*), beans and pease grown together.

Blooth (*Dors.*), blossom. [*Dev.* Hal.]

Blow, blossom.

Bluffs, shades for horses' eyes.

[Probably does not mean what are usually known as 'blinkers,' but shades put over horses' faces to prevent them straying. At any rate in Cheshire it is no uncommon thing to see a rambling cow with a square piece of sacking hung from her horns so as to prevent her seeing her way in front. She is then said to be 'blufted.'—R. H. Hal. however has '*Blufted*, hoodwinked; *bluffs*, blinkers. *Linc.*']

Boat (*Scotl.*), tub for meal or meat.

Bodkins, draught-trees.

Boosts (*Lanc.*), stalls in a cow-house, rising from the staddle to insure ventilation of the rick.

[There is evidently some confusion here. A staddle is a framework on which a rick or stack is built to keep it from the damp ground, and as a protection from rats. A cow-stall placed in the middle of a stack to ensure ventilation is an

absurdity. The word, probably, has two meanings: (1) a cow-stall, but the *Lanc.* and *Ches.* word is *boose*, plural *booses*; I have never heard the form

[135]

boosts. (2) A flue or vacancy in a stack to ensure ventilation. These flues are not unfrequent, and are made by placing a sheaf of corn or straw on end, and building up a corn or haystack around it. When the stack reaches the height of the sheaf the latter is drawn up a stage, and more corn or hay piled round. The process is continued to the top of the stack, and when the sheaf is finally pulled out at the apex, it leaves a chimney from bottom to top through which the air passes and keeps the rick cool.—R. H.]

Boosy or **Boosin** (*Heref., Ches., &c.*), the manger of a cattle stall.

[There is some confusion here. *Boose* is the *Ches.* word for a stall. *Boos(e)ly* and *boosin(g)* are adjectives, meaning that which is contiguous to a boose.—R.H. See **Boosey** in *Agric. Survey*, p. 118.]

VII. WEIGHTS AND MEASURES.

FROM MORTON'S 'CYCLOPEDIA OF AGRICULTURE' (1863)

(pp. 1123-1127).

The following article is chiefly intended as an addition to the previous one on PROVINCIALISMS. The weights and measures indicated are given on the authority, in great measure, of private correspondence with the districts to which they refer, but also on that of the second report of the Commissioners on Weights and Measures.

The following is a condensed statement of such provincial customs, as regards weights and measures, as we have been able to ascertain.

Bag, of hops (*Kent*), is 2 cwt. 2 qrs. Of wheat (*Dev.*), 2 bushels. (*Sal.*), 3 bushels. Of oats (*S. Wales*), 7 heaped measures, or 8½ struck.

Barrel (*I. of Man*), of lime, 6 Winchester bushels. (*Channel Islands*), of charcoal and lime, 60 gallons. (*Wales*), of lime, in some counties, 3 provincial bushels of 10 gallons each, making 3¾ Winchester bushels. (*Cromarty and Ross*), of limestone, 32 gallons English. (*Kincardinesh.*), of flax, 18 pecks. (*Ireland*), of barley [and] rape, 16 stone of 14 lbs.; of beans, pease, wheat, and potatoes, 20 stone; of malt, 12 stone; of oats, 1 stone; of oatmeal, 8 stone; of bran, 6 stone; of lime, 40 gallons of 217⁶/₁₀ cubic inches each.

(Though the barrel is in each case a fixed weight, yet it was originally a measure of fixed dimensions, equal to 9981·864 cubic inches, or equal to 4½ imperial bushels of 2218·192 cubic inches exactly (each bushel being 8 gallons of 272·274 cubic inches); whence it appears that the above weights per barrel were calculated in the cases of wheat, oats, and barley, at the following average weights per bushel:—wheat, 62·22 lbs.; oats, 43·55 lbs.; and barley, 49·77 lbs.)

Basket (*Kent*), of cherries, 48 lbs.

(*I. of Man*), of barley and oats, 6 bushels; of pease, 4 bushels; of potatoes, 16 heaped pecks; of wheat, 4 bushels, weighing 64 lbs. each. (*Yks.*), 2 bushels. (*Scotl.*), of grain, the boll contains four firlots, nearly 6 Winchester bushels, or more accurately, 5·9626; of oatmeal 140 lbs. English = 8 Dutch stone, or 10 English = 16 pecks; of marl, 8 cubic

feet. (*Aberdeensh.*), 1 $\frac{1}{9}$ boll of the Linlithgow standard; of barley, bere, or oats, 4 Aberdeen firlots - 136 pints of 60 $\frac{3}{4}$ oz. each; of coal, 36 stone = 630 lbs. English; of lime, 128 Aberdeen pints, each containing 105 cubic inches; of potatoes = 12 bushels imperial = 6 $\frac{1}{4}$ cwts. (*Angus*), of meal, 8 stone; of potatoes, 32 stone. (*Argylesh.*) of grain, at Inverary, 4 firlots, 7 $\frac{1}{4}$ per cent. above the standard, making 6 bushels, 1 peck, 9 pints, 10 cubic inches English; of meal, at Inverary, 8 stone; in some parts, 9; at Campbelton, 10. (*Ayrsh.*), of lime, 4 or 5 bushels, in some places more or less. (*Banffsh.*), of barley, 17 stone, or 17 $\frac{1}{2}$; of potatoes, 36 stone. [I have never known hay sold by the long hundred-weight in Cheshire. It is uniformly sold now by the imperial ton, by the cwt. of 112 lbs., or by the stone

of 14 lbs. In Liverpool, however, a stone of hay or straw is 20 lbs. The method of weighing hay for delivery in Cheshire is rather curious, and perhaps worth recording. The hay is out into 40 trusses to the ton, each truss being supposed to weigh 56 lbs. The hay-cutter cuts them, in the first instance, as nearly 56 lbs, each as he can guess; and when the whole 40 trusses

[172]

are cut he begins weighing them on a steelyard (locally called 'drones'), which is furnished with two long hooks to hook into the bands around the truss. Of course it is very rarely that a truss happens to weigh 56 lbs. exactly; but whatever weight is under or over the 56 lbs. is recollected, and the under or over-weight of each succeeding truss is subtracted from or added to the previous total under or over-weight, until the whole are weighed. An example will best illustrate this. Suppose truss 1 weighs 59 lbs., this is 3 lbs. over-weight; truss 2 weighs 55 lbs., or 1 lb. under-weight, which subtracted from the 3 lbs. leaves 2 lbs. over-weight for the two. Truss 3 may weigh only 50 lbs., or 6 lbs. short, but there are already 2 lbs. over; the balance, therefore, is 4 lbs. short in the three trusses. If the balance begins to get much too high or too low, some hay is taken from or added to a truss to equalize it a little. When the last truss is weighed the whole ton may be a few pounds over or under, and this is rectified in the last truss. The process is called 'cutting it truss-weight.'—R. H.]

BUNGAY:

PRINTED BY CLAY AND TAYLOR,
THE CHAUCER PRESS

[1]

The Subscriptions for 1881 are due on January 1, and should be paid at once to GEORGE MILNER, ESQ. (Treasurer), Moston House, Moston, Manchester, by Cheque or Post-office Order (payable at the Manchester Post-office), or to the Society's account at the Manchester and County Bank, King Street, Manchester.

No Publications for any year are sent to Members who have not paid their subscriptions for that year.

EIGHTH ANNUAL REPORT,
FOR THE YEAR 1880.

- § 1. *Publications of the Year.*
 - § 2. *Binding of the Publications.*
 - § 3. *Work in Preparation.*
 - § 4. *County Arrangements and Editors.*
 - § 5. *Publications for 1881.*
 - § 6. *Donations.*
 - § 7. *Finances and Membership.*
 - § 8. *Dialect Work outside the Society.*
- Treasurer's Balance Sheet.*
List of Members.

§ 1. Three books and a pamphlet have been issued during the year 1880. The books include three original glossaries, namely, of Words in Use in West Cornwall, by Miss Margaret A. Courtney; of Words in Use in East Cornwall, by Mr. Thomas Q. Couch; and of Words and Phrases in Use in the Counties of Antrim and Down, by Mr. William Hugh Patterson. The Society is greatly indebted to the authors of these excellent contributions, which for thoroughness of execution and general excellence will bear comparison with any of our previous issues. By a specially fortunate coincidence the two Glossaries of Cornwall Words were ready at the same time, and it was thus possible to publish them together. For the other volume, *Old Country and Farming Words gleaned from Agricultural Books*, the Society is indebted to the tireless industry of Mr. James Britten. The words and phrases contained in

two hundred pages have been gathered together from some seventy volumes, mostly books that are either inaccessible to ordinary readers, or are rarely seen by them. It may safely be said that no such collection of rural terms is elsewhere to be found. Considering the scarcity and the scattered nature of the sources from which the words have been drawn, this volume is fairly entitled to a place in the Original Series of the Society's publications, and its value has been enhanced by the notes of the Editor (Mr. Britten), Professor Skeat, and Mr. Robert Holland. The remaining publication of the year is an Early English Hymn to the Virgin in English and Welsh orthography of the fifteenth century, edited from two manuscripts of the Hengwrt collection by Mr. F. J. Furnivall, with notes on the Welsh phonetic copy by Mr. A. J. Ellis, F.R.S. This interesting pamphlet is a reprint from the *Archæologia Cambrensis*, secured to the Society at a comparatively nominal cost by the kindness of Mr. Furnivall. It forms one (the third) of the Society's *Miscellanies*.

§ 2. Renewed and pressing representations concerning the binding of the volumes having been received from some of the members, Professor Skeat has kindly prepared a paper of "Suggestions," embodying an arrangement whereby twenty-four of the Society's Publications can at once be bound, leaving six which must necessarily remain in their paper covers until other parts completing the volumes are issued. The scheme is distinctly offered as a suggestion only, and can be set aside by those members to whom the arrangement is useless, or who prefer to wait until the Society's work is finished. With Mr. Skeat's paper of "Suggestions" a set of title-pages for the ten volumes will be issued. These papers are already printed, and will be in the bands of the members in the course of a few days.

§ 3. The following shows the work in preparation, the paragraphs containing new information or reporting any changes being marked with an asterisk (*):

Beds. A collection of words has been made by the Rev. W. F. Rose, who has, however, been compelled to relinquish the preparation of a Glossary. (See Seventh Report, p. 4.)

Berks. Contributions of some words have been received from the Rev. W.

F. Rose. Sir F. Madden's MSS. also contain some notes of words.

'*Cheshire.* Mr. Robert Holland has made great progress in the collection of materials. He has been fortunate in obtaining some special lists of salt-mining and salt-manufacturing terms, and of silk-manufacturing words, with promises of contributions from the Wirral Hundred, Northwich,

[3]

Macclesfield, and Mottram-in-Longdendale. It would greatly enrich the collection if some correspondents would kindly undertake to supply peculiar words, phrases, and terms used (1) in the hatting trade of Stockport and the northeastern corner of Cheshire; (2) in the felt manufacture about Romiley; (3) in the fustian-cutting trade of Lymm, Latchford, and neighbourhood. Mr. Holland hopes to get his work ready for the press by the end of 1881 or early in 1882.

'*Cumberland.* Miss Powley, of Langwathby, near Penrith, has promised to prepare for the Society her collection of Cumberland words, with notes on the old customs and old industries of the county on which the words throw light. Another supplementary list of Cumbrian provincialisms has been received from Mr. Dickinson.

Derbyshire. Dr. Pegge's MS. of Derbycisms has been transcribed for the Society, to be edited by Mr. Hallam, assisted by Professor Skeat.

'*Devonshire.* A Glossary is being prepared by Mr. Shelly; to be printed for the Society. The Rev. John Davies has kindly sent a small list of Devonshire words transcribed from *The Country-Man's Conductor in Reading and Writing True English*, by John White, of Tiverton; printed in Exeter in 1701.

Dorsetshire. Some words have been contributed by the Rev. William Barnes, which are not to be found in his Glossary.

Essex. Professor Skeat has collected a considerable number of Essex

words, from various sources.

'Hants. The collections by Sir F. Madden and F. Wise, Esq., have been placed by Professor Skeat (with his own MSS.) in the hands of the Rev. Sir William H. Cope, who has kindly undertaken to prepare our Hants Glossary.

'Isle of Wight. The promised Glossary by Mr. C. Roach Smith is completed, and in the hands of the printers.

'Lancashire. A portion of the second part is already in the printers' hands, and it is hoped that the work will now go steadily forward to its completion.

'Leicestershire. The Glossary of the late Rev. Dr. A. B. Evans has been revised and extended by his son, Dr. Sebastian Evans, who has added some valuable and interesting introductory chapters. The volume will form the first Publication of the Society for 1881, and will be issued at once.

Lincolnshire. Mr. Edward Sutton, of North Road, West Gorton, Manchester, has placed at the service of the Society a list of words in use, now or recently, in North

[4]

Lincolnshire. The precise locality is between Alford and Grimsby, with Loath as a centre.

Montgomeryshire. The Rev. Elias Owen, of Caersws, is engaged upon a Glossary.

Notts. Mr. R. White has a Glossary in hand.

'Oxfordshire. Mrs. Parker has prepared & supplement to her former list (*A Glossary of Words used in Oxfordshire*, in No. 12 of the E. D. 8. Publications, 1876), and placed it at the service of the Society.

Somersetshire. Mr. Elworthy is still engaged upon his Glossary of West Somerset words, which, with the essay and grammar by him already issued, will complete his work upon this important dialect.

The Salamanca Corpus: *Old Country and Farming Words* (1880)

The Rev. W. F. Rose will prepare for the Society a Glossary of North Somerset words. (See Seventh Report, p. 5.)

Staffordshire. Mr. C. H. Poole has issued during the year, at an almost nominal price (1s.), a Glossary of Staffordshire words, incorporating a list of words in use in the northern parts of the county, contributed by Mr. Alfred T. Story. In his preface Mr. Poole says: "I trust that some Staffordshire member of the English Dialect Society will be so interested as to assist me in the revision of a new edition, and to add an introduction on the grammar and pronunciation of the dialect." The revised and extended Glossary will probably be included in the E. D. S. series.

Westmorland. Mr. Harrison, of Beckenham, has placed in the hands of the Society (through Mr. Britten) a M.S. list of provincialisms in use in Westmorland in the year 1797, collected by Mr. James Atkinson. This is now being transcribed for the press. It will probably be edited by Professor Skeat, who also has in hand the Westmorland Glossary of the late Mr. Just.

Worcestershire. The completed MS. of the Glossary of West Worcestershire words, by Mrs. Chamberlain, of Hagley, has been received by the Honorary Secretary. It is an extensive collection, compiled with great industry and scrupulous care, and well illustrated with colloquialisms. It will be sent to press as soon as possible.

Yorkshire The Rev. Thomas Lees, of Wreay, Carlisle, has completed the late Rev. A. Easter's list of Huddersfield words, and it will be printed as soon as the funds of the Society will permit. Of Mr. Goodchild's Swaledale list and Mr. Leader's Sheffield Glossary there is nothing new to report.

Fish Names and Fishing Terms. Mr. Thomas Satchell (Downshire Hill House, N.W.) is engaged upon this work. He will be glad of the assistance of members.

[5]

Bird Names. The Folk-lore Society have announced the pending issue of a work on English Bird Names and Folk-lore, by the Rev. C. Swainson. It is anticipated that some arrangement may be made whereby the list of Bird Names will be available for issue to the members of the Dialect Society.

Animal, Reptile, and Insect Names. Mr. James Britten, F.L.S., is at work on a Dictionary of the English Names of Animals, Reptiles, and Insects, which, with the lists of birds, plants, and fishes already provided for, will render a complete natural history dictionary possible some day.

Turner's "Herbes." The text of this very rare black-letter book is already in type for the Society. The full title of the work is, *The Names of Herbes, in Greke, Latin, English, Duch, and Frenche, wyth the commune names that Herbaries and Apotecaries use.
