Research paper

Educating digitally competent teachers: A study of integration of professional digital competence in teacher education

Elen J. Instefjord ^{a,*}, Elaine Munthe ^b

^a Western Norway University of Applied Sciences, P.O. Box 7000, 5020 Bergen, Norway
^b Faculty of Arts and Education, University of Stavanger, Norway

HIGHLIGHTS

- Teacher education efficacy relates positively with digital competences.
- 20% of teacher educators believe they are good role models for use of technology.
- Pre-service teachers are critical of the HEI's emphasis on digital competences.
- The influence of management on technology integration should be explored further.

1. Introduction

As society has become more and more digitized, the demand for digitally competent teachers has evolved, imposing the need for new approaches when it comes to integration of technology in education. Teacher education is regarded as a natural place to start this integration (Kay, 2006), but recent research indicates that there is a mismatch between the digital demands that newly qualified teachers meet in their profession and the training in using instructional technology provided during teacher education (Gadmer & Gosselin, 2014). Research indicates that in order for technology integration to take place, teachers need access to relevant equipment, workplace support and positive attitudes toward technology (Lefwich, Salik, & 2002). Being able to integrate a purpose involves having a set of conditions, both personal and teaching-profession skills. This digital competence for teachers (2014). Teacher educators have not only should they be able to teach, they should also to teachers' professional digital like teacher education, where both on campus and in field technology is integrated on a self-regulated efficacy and digital competences. Results are discussed in qualifying for professional work in digital classrooms.

A review of the literature on citation impact indicators

Waltman L
2015

Citation impact indicators nowadays play an important role in research evaluation, and consequently these indicators have received a lot of attention in the bibliometric and scientometric literature. This paper provides an in-depth review of the literature on citation impact indicators. First, an overview is given of the literature on bibliographic databases that can be used to

2. Introduction of bibliographical references in Mendeley

The image shows a screenshot of the Mendeley document creation interface. On the left, there is a form with several sections: a dropdown menu at the top set to 'Journal Article', a 'TITLE' field, an 'AUTHORS' field, an 'ABSTRACT' field, and a 'DETAILS' section with fields for 'Journal', 'Year', 'Volume', 'Issue', and 'Pages'. On the right, a dropdown menu is open, displaying a list of document types. The 'Journal Article' option is highlighted in blue. A red arrow points from the dropdown menu back to the form's dropdown menu.

Folders

2. Introduction of bibliographical references in Mendeley

The image shows a sequence of three screenshots from the Mendeley application. The first screenshot on the left shows the 'MY LIBRARY' sidebar with the 'FOLDERS' section expanded, highlighting the '+ Create Folder...' option. A red arrow points from this option to the second screenshot in the middle, which is a dialog box titled 'Please enter a folder name' with an empty text input field and 'Aceptar' and 'Cancelar' buttons. A second red arrow points from the 'Add folder...' option in the third screenshot on the right to the input field in the second screenshot. The third screenshot shows a dropdown menu from the '+ Add' button with options: 'Add file(s)...', 'Add entry manually...', and 'Add folder...'.

Folders

2. Introduction of bibliographical references in Mendeley

The screenshot shows the Mendeley Desktop interface. At the top, there are action buttons: 'Add to', 'Remove from folder', and 'Delete'. Below this, two documents are listed, both with checkmarks and star icons:

- A review of the literature on citation impact indicators
Waltman L in Journal of Informetrics
- On full text download and cit
Moed H, Halevi G in Journal of the A

A blue dialog box is open, titled 'Add 2 documents to', with a close button (X). Below the dialog, there are tabs for 'My Library' and 'Groups'. A list of folders is displayed, with a blue arrow pointing to the 'Create Folder...' option:

- + Create Folder...
- ★ Favorites
- 🎓 My Publications
- 📁 Integración >
- 📁 Libro electrónico y bibliotecas >
- 📁 Medios sociales >
- 📁 Métricas alternativas >

A red arrow originates from the 'Add to' button and points to the 'Create Folder...' option in the folder list.

Abstract:

In a literature survey on how reference collections have changed to accommodate patrons' webbased information-seeking behaviors, one notes a marked "us vs. them" mentality--a fear that the Internet might render reference irrelevant. These anxieties are often noted in articles urging libraries to embrace digital and online reference sources. Why all the ambivalence? Citing existing research and literature, this essay explores myths about the supposed superiority of

Abstract

abstract and keywords

The article discusses the TeachMeets meeting between the Tinder Foundation and the CILIP Information Literacy Group (ILG) on digital inclusion and digital literacy that was held in London and Leeds in England in February 2016. Topics include the role of public libraries in the society, basic digital skills, and the use of social media to promote library services.

Journal Article

The Use of Visual Tools in the Academic Research Process: A Literature Review

Renfro C

The Journal of Academic Librarianship
2017 vol: 43 (2) pp: 95-99

An academic librarian, especially one who works primarily in a research consultation capacity, often encounters individuals who are seeking in-depth help with research projects that they struggle to explain. The number of concepts, interdependencies and assumptions involved in research projects today can make them difficult to understand and discuss with library users.

6. Advanced features of Mendeley

Import several documents

Web importer

The screenshot shows the Springer Link search results page. On the left, there are filters for 'Content Type' (Article), 'Discipline' (Social Sciences), and 'Subdiscipline' (Library Science). The main search results show 25 results, with the top two articles highlighted: 'William A. Kelly and Giulia Trentacosti (eds): The Book in the Low Countries' and 'Academic Journals Plagued by Bogus Impact Factors'. A Mendeley Web Library importer window is overlaid on the right side of the page, showing a list of the same three articles. Red arrows point from the search results to the importer window. The importer window has a 'Web Library' title bar, a search bar, and a 'Save all' button. The list of items in the importer window includes the three articles, each with a checkbox and a 'Details >' link. The 'Details >' links for the three articles are circled in red.

Academic Journals Plagued by Bogus Impact Factors

The current status of academic publishing is worrying. Cybercriminals are now targeting academic journals, making it necessary to inform both editors and authors about such issues. The latest involvement of cybercriminals in the publishing industry is discussed in this article by Mehdi Dadkhah, Glenn Borchardt, Mohammed Lagzian, et al. in *Publishing Research Quarterly*.

6. Advanced features of Mendeley

Citation Plugin

Make bibliography creation easy: our Citation Plugin lets you cite as you write. It's fully compatible with Word (including Word for Mac) and LibreOffice.

Supported word processing software

Microsoft Word

LibreOffice

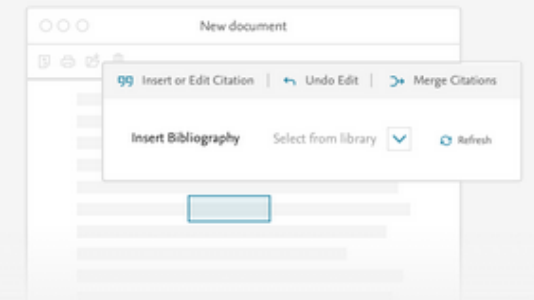

1. Install Mendeley Reference Manager

Download the Reference Manager software and Citation Plugin will install automatically.

2. Import documents to create your library

Mendeley captures all the document metadata, making citation easy.

3. Start citing and building bibliographies

Select from over 1,000 citation styles or create a new style. You can now cite directly as you write!
